EDUCATION

Graphic Era Deemed to be University

Bachelor of Technology in Computer Science & Engineering; CGPA: 7.55

Dehradun, UK

2022 – 2026

Sagar Public School

Class XII CBSE; Percentage: 92.8%

Bhopal, MP

May 2021

Sagar Public School

Class X CBSE; Percentage: 95.8%

Bhopal, MP

May 2019

EXPERIENCE

Web Development Intern

Aug 2025 – Nov 2025

Jabsz Studios

Remote

- Engineered and maintained scalable backend systems and full-stack web applications using the MERN stack (MongoDB, Express, React, Node.js).
- Developed internal tools and REST APIs supporting CRUD operations, authentication, and operational workflows.
- Optimized database operations and backend API performance, reducing data retrieval latency by 15% through indexing and query optimization.

PROJECTS

Talkify | *React, Node.js, Express, MongoDB, REST APIs, Tailwind CSS*

GitHub | Live

- Engineered a real-time video calling and chat platform with low-latency communication using GetStream.io.
- Implemented secure backend authentication using JWT and Bcrypt, ensuring protected user data access.
- Designed and documented backend APIs, system workflows, and internal services for maintainability and scalability using Express.js.
- Managed full-stack development lifecycle including testing, debugging, and deployment.
- Implemented 32 dynamic UI themes using DaisyUI and Tailwind CSS.

TripLodger | *Node.js, Express, MongoDB, Passport.js, Cloudinary, EJS*

GitHub | Live

- Developed a full-stack travel accommodation platform connecting users with property listings.
- Implemented REST APIs, authentication, and role-based access control for backend systems.
- Built complete CRUD operations with backend validation, testing, and database integration.
- Implemented complex backend logic including Role-Based Access Control (RBAC) and secure authentication using Passport.js

Oceanova | *GeminiAPI, React, OpenweatherAPI, TailwindCSS*

GitHub

- Developed a responsive maritime weather intelligence dashboard providing real-time oceanic weather conditions and 5-day forecasting insights.
- Integrated OpenWeather API to fetch and visualize live meteorological data.
- Engineered AI-powered vessel optimization features using Gemini API to generate smart routing, speed, and fuel-efficiency recommendations.
- Built dynamic weather alert systems for hazardous maritime conditions such as high winds

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python, C++, C, SQL, PHP

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap, Tailwind CSS, DaisyUI

Backend: Node.js, Express.js, REST APIs, JWT.

Database: MongoDB, MySQL, Mongoose

Developer Tools & Devops: Git, GitHub, Postman, VS Code, Docker, Vercel, Render

Core CS: Data Structures & Algorithms, Object-Oriented Programming OOPS, DBMS, Operating Systems, Computer Networks, SDLC, Testing

AI & APIs: Gemini API, Prompt Engineering, LLM integration

ACHIEVEMENTS

Top 30 Finalist: MariTHON 24-hour Hackathon, Graphic Era University, Contributor GirlScript Summer of Code 2025.
